Full-stack software engineer with 3+ years building and shipping web applications for enterprise and nonprofit clients at a software services company. Experienced across React/Next.js and Node.js/Express, with a focus on backend systems and business logic. Comfortable owning features end-to-end, from implementation through AWS deployment, and picking up unfamiliar or inherited codebases. Malaysian national, open to Employment Pass sponsorship in Singapore.

WORK EXPERIENCE

Software Engineer — Auronex Sdn Bhd, Kuala Lumpur

Feb 2023 – Jul 2026

- Delivered 5 client web applications end-to-end, building REST APIs in Node.js/Express and React/Next.js frontends across the full project lifecycle, including deployment to AWS (EC2, S3).
- Built core features for an **AI content generation platform** for a multinational client, including image and video generation, sketch-to-image, and generative fill.
- Contributed across the stack on a **gamification and rewards platform**, building the admin portal and supporting backend logic.
- Took over a **dictionary platform** from a previous team, resolving outstanding defects to bring it to release, and delivered a custom WordPress site for the same NGO client.

SKILLS

Frontend: TypeScript, JavaScript, React, Next.js, Tailwind CSS, HTML/CSS

Backend: Node.js, Express

Databases: PostgreSQL, MongoDB

Cloud & Tools: AWS (EC2, S3), Git, Docker, GitLab CI
